

## **BAKBASEL International Benchmarking: List of Indicators**

The standard dataset of the International Benchmarking Database contains regional time series (annual data, 1980-2007) on the following indicators:

### **General Data**

- Population
- Area

### **Economic Performance Data**

Economic Performance Indicators are generally available for industries (see below for list of industries)

- Employment
- Total Hours Worked
- Gross Domestic Product (GDP, aggregate economy only)
- Gross Value Added
- Labour Productivity
- Hourly Productivity
- Labour Cost per Hour (not available for all regions)
- Unit Labour Costs (not available for all regions)

Indicators measured in monetary terms are available in:

- national currency
- current prices ("nominal")
- constant prices ("real", based on Year 2000 prices)
- in USD, based on 1997 PPP's
- USD, EUR, CHF (further currencies on demand) based on current exchange rates

### **Location Factors**

Indicators on Location Factors include national and/or regional information. The indicators vary concerning their time coverage. The following indicators are available for most of them:

- Regulation
- Taxation
- Accessibility
- Innovation
- Quality of Life (only selected regions)
- Decentralisation Indicators
- Openness Indicators
